

industrial crayons

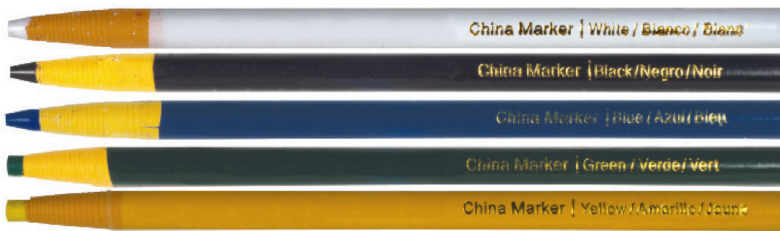

Our premier lumber crayons work on more than just wood. They are formulated to work well on lumber, metal, concrete and most other surfaces, wet or dry. These crayons are resistant to the elements and maintain their vibrant color longer than other similar products. Their melting point is 185° so they can stand up to just about any industrial setting. These are 4 1/2" long, 1/2" in diameter and are molded in a hexagonal shape to maintain stability on uneven surfaces.

item #	color	per pack	price

These china markers are ideal for marking on ceramic tile, glass or any smooth surface. They are equipped with a rip cord for quick and easy sharpening. China markers come with a bar code and are packed 12 to a box.

carpenter's pencils

Our carpenter's pencils help make your mark more accurately so you cut once, not twice. They are made from unfinished basswood so they are durable yet easy to sharpen. These pencils are 7" long, 1/2" wide and their flat shape helps keep them from rolling off of uneven work surfaces. Pencils come with a bar code and are packed 12 to a box.
